GRADE: Product Comparison, No Rating

Among PC-based personal information managers (PIMs), Day-Timer's Day-Timer Organizer 98 excels. It is a mix of simplicity, power, and fast performance. It even has auto-fill and color printing. A number of new utilities round off the excellent features of this product. Day-Timer Organizer works well with most other PIMs. It can import and export data directory from Microsoft Outlook, Schedule Plus, and Symantec's ACT! for PalmPilot users, transfers can be effected using Puma Technology's IntelliSync software. A second choice is Starfish Software's Sidekick 98. It is also easy-to-use and powerful. Sidekick has a very simple interface and a low price. It has the unique ability to make it easy to publish personal information on the Web. It also features built in support for the

REX card and 3Com Palm Pilot. For users who already have WordPerfect Suite 8, CorelCentral 8 will be a useful addition. For other users, it may lack too many necessary PIM features. Time & Chaos 5.3 is shareware, and a PIM favorite from iSBiSTER International. It fully covers basics of managing personal information. It has a plug-in that lets users post a calendar to the Web, and it can add a link to an individual's entry to a map of that person's location on the mapQuest Web site. Limitations with Time & Chaos are that it only imports ASCII files and lacks integrated synchronization capabilities between T & C databases.

Comprehensive article on how to buy computer hardware and software from Internet catalogs offers informative feedback on Web outlets, services that offer prices, selections of multiple sites, and some smart shopping strategies for prospective buyers. For hardware, Dell's online store offers a wide selection, excellent support and return policies, and a good configuration tool for placing orders. Computer ESP is a top-notch shopping service, providing a good selection of search and comparison tools that can sort through the huge array of computer gear and accessories from more than 90 Web-based stores. Internet Shopping Network is one of the better all-around online stores that carries everything from PCs to peripherals, with an outstanding range of prices, selections, and policies. Elek-tek also features a wide array of products and prices at a site that is easy to navigate. Computer Discount Warehouse offers a well-rounded range of products and prices, but falls short in customer service.

Based on

EP 762535

Abstract (Basic): EP 762535 A

An antenna (6, 7, 9) for a transponder comprises a magnetic core (4) of a composite material and a coil (5) wound on the magnetic core.

Also claimed is a plate transponder (8) comprising 2 plate antennae (6, 7) composed of a wound conductor on a magnetic core (4) and an air-core antenna (9) composed of a spirally wound conductor.

The composite material comprises layered rectangular metallic thin plates, pref. 3-16 plates of an amorphous magnetic material of thickness 20-50 micron, which are insulated by oxidising their surfaces. The corners may be cut or **rounded**. The ratio of shorter side:longer side = 0.4-1.0. The antenna has a thickness of 0.4 mm or less. The coil conductor has a dia. of 100-200 micron. It is wound on the core perpendicular to the longer side. The magnetic core may be provided as a plate and the composite material may comprise magnetically soft flakes, pref. selected from pure iron, silicon steel, a permalloy (Fe-Ni) and an iron/cobalt amorphous alloy; and a synthetic resin. Pref. are flakes of amorphous Co-Fe-Ni-B-Si of max. thickness 30 (10) micron and dia. 50-2000 (100-1000) micron. The resin is selected from thermoset epoxy, phenol, ureal unsatd. polyester and 4 named other resins, or from thermoplastic polyethylene, polypropylene, etc.

USE - As an ID card, a commuter pass or a **coupon** ticket, which operates at a frequency of over 100 kHz with a plate [magnetic flakes in a binder] magnetic core or at 40-200 kHz with a core comprising layered thin plates (claimed). The transponder is suitable for the above uses when operated at a frequency of 40-200 kHz (claimed).

ADVANTAGE - The antenna is thin and flexible, allowing it to be carried in a pocket, it has a small loss, including eddy current loss, at a high frequency and it is not affected by the proximity of coins, aluminium foil in a cigarette packet or other ferrous or non-ferrous metal materials, e.g keys for cars or buildings.

Patent Details:

Patent	Kind	Lan	Pg	Filing Notes	Application	Patent
FR 2723070	A1		9			

Abstract (Basic): FR 2723070 A

The carrier bag has its walls formed from two thin sheets of flexible plastic or paper. The double-walled sheet is cut and folded to form a bag with the edges welded or glued along the bottom and two sides, leaving the top open to insert goods. The upper part has oval holes (10,11) with reinforcing round the edges to form a handle.

One side of the carrier has the outer of the two sheets forming the side marked with promotional and discount coupons. The coupons have the edges weakened so they can be torn from the side of the carrier bag and used by the customer. The outer face of the inner sheet is printed with the same image as the outer, so it is not obvious that the coupon has been removed.

USE/ADVANTAGE - Carrier bags for promotional purposes. Allows number of promotional coupons to be removed from side of carrier bag without reducing strength of carrier bag.

Patent Details:

Patent	Kind	Lang	Pg	Filing	Notes	Application	Patent
SE 8205792	A		8				

Abstract (Basic): SE 8205792 A

The marking sheet comprises at least one playing area corresponding to that for marking, and all game fields on the sheet are surrounded by perforations so that they can be pressed outwards individually. The sheet itself is of cardboard, and on checking winnings, the field corresponding to the appropriate number is pressed out of the sheet, and laid on a corresponding **coupon** area, permitting rapid checking of winnings.

Normally, the game fields are rectangular, but variations are possible whereby the perforations form rings around the fields, have **rounded** corners, or are formed cross-shape in the centre of each field. (Provisional Basic advised week 84/22)

ABSTRACT EP 743225 A2

An assembly including a pivotally-supported handle, for example a grab handle for use within a motor vehicle, comprises the handle (10; 30) itself and at least one pivot support member (12; 32) having one or more pivots (11; 31) projecting from it. A socket (14; 34) in the handle is adapted to receive one of the pivots inserted into the socket in a direction transverse to the pivot axis and the pivot is retained in the socket by a retaining means (15). ABSTRACT EP 570317 A1

The present invention is related to a peel off coupon redemption card and tracking system, and the method of making it.

Peel off coupon redemption card (10), characterised in that it comprises:

- a base layer having a front face (25) and a back face (15);
- a thin adhesive layer (40) applied to said back face (15) of said base layer;
- a coupon layer (50) having a coupon face and an adhesive face; said adhesive face of said coupon layer (50) being applied to said adhesive layer and having the same overall dimensions as said base layer;
- said coupon face of said coupon layer (50) having coupons printed on it and scored at regular intervals to form a matrix of small adhesive backed removable coupons (20). (see image in original document)

ABSTRACT EP 336732 A2

Disclosed is a thermally-curable, one-part epoxy adhesive composition
comprising: (1) a glycidyl ether epoxide having an epoxy functionality
greater than one and a molecular weight between about 150 and 10,000; (2)
a catalyst comprising (i) an acid of the formula $H(\text{sup } +)SbF(\text{sub } 5)X(\text{sup } -)$
wherein X is halogen, hydroxy, or -OR where -OR is the residue of an
aliphatic or aromatic alcohol having a molecular weight less than about
10,000 and (ii) N,N-diethyl-o-toluidine; (3) an aliphatic or non-aromatic
cyclic polyol having about 2 to 18 carbon atoms, at least two hydroxy
groups of which are primary or secondary, and being free of
electron-withdrawing substituents, amine substituents, or large
substituents that cause steric hindrance in the a-position in relation to
the carbon attached to the methylol group of the polyol; and (4) a
toughening agent that does not react with the epoxide during curing and
has an epoxide compatible component and an epoxide incompatible
component. Also disclosed is a method of adhering metal substrates
together with the adhesive composition of the invention.

ABSTRACT EP 202018 A1

A mother-blank matrix-plate 1 to receive upon its surface electrolytically-deposited layers of metal and/or of a metal-rich compound such as a metal-oxide, which layers are readily detachable from that surface, the mother-blank matrix-plate 1, during its manufacture, having undergone a process of cold-working of such intensity as to reduce significantly the grain or crystal size throughout the thickness of the mother-blank matrix-plate, thereby evidencing the absorption of free energy in its crystal structure. The invention also relates to any process of electrodeposition employing such mother-blank matrix-plate, and to the products of such process.

Abstract: Since a seminal article by Langer, Blank & Chanowitz in 1978, there has been great interest in the 'mindlessness of ostensibly thoughtful action.' Behaviors appearing to result from conscious, thoughtful processing, may actually be the result of expectations developed from previous actions and mindless re-enactments of a recalled sequence. One previously performed a behavior with a favorable outcome, and then formed a 'script' for future behaviors which could be re-enacted without mindful information processing. Mindlessness has been frequently reported in both the psychological and marketing literature. As an example Pettit-O'Malley & Williams found that many consumers mindlessly redeem grocery coupons without reflecting on the magnitude of savings. That is, consumers were shown to redeem bogus coupons (savings of less than 1%) as regularly as those with significant savings when both regular and 'sale' **prices** were **printed** on the **coupons**. Also, presumed savings from both **coupon**-type redeemers were equivalent. Their study generated further interest in consumer mindlessness at Decision Sciences Institute, which led to the current panel. (Author abstract) 9 Refs.
